DETAILED ACTION

This action is responsive to the Amendment and RCE filed 09-26-2003 and 10-27-2003, respectively and to the Preliminary amendment filed 11-20-2002, which was cross during mailing. Claims 1-4 are currently pending.

Continued Prosecution Application

1. The request filed on 10-27-2003 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/926,158 is acceptable and a RCE has been established. An action on the RCE follows.

Drawings

2. The drawings are objected to because in figure 6, the formula $Y=YrX \sqrt{(L-X)/L}$ is confusing because this formula does not correspond to the formula in claim 3 and the specification. It appears that the X in YrX should be a multiplication sign. It is suggested to either leave out the X or replace the X with a dot. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: in the formula on page 12, the x in the expression Yrx is unclear as set forth in the claim objection below. Appropriate correction is required.

Claim Objections

Claim 3 is objected to because of the following informalities: in claim 3, the formula as written is confusing because it appears that the x in Yrx is a dimensional quantity. It is

Application/Control Number: 09/926,158

Art Unit: 3682

suggested to delete the x from the formula or replace it with a dot. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 5. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Yagasaki et al.('830). Yagasaki et al. discloses the claimed invention including the belt comprises a pair of ring slots (S), a large number of elements (14) in the ring slots, the metal blocks includes a neck (7), a pair of ears (6), an element body (3) integrally connected to the lower portion of the neck, a pair of left and right saddle faces (1), a pair of left and right V-faces (2), a pair of left and right recesses (not labeled) in the lower edge of the element body (3). It is apparent the upper end is characterized by an upper end and a lower end and the saddle face is characterized by an inner end and an outer end such that a first line connecting the lower end of the body to the upper end of the V-face is determined and a second line connecting the lower end of the V-face and the inner end of the saddle face is determined, and a position of the recess (not labeled) is determined in the vicinity of the point of intersection where the first and second lines meet. Furthermore, it apparent that when the downward load is applied from the metal ring assembly to the outer end of the saddle surface, the folding resistant strength of the element body is uniform laterally.

Art Unit: 3682

Allowable Subject Matter

6. Claims 2 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

- 7. Claim 3 is allowed.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marcus Charles whose telephone number is (703) 305-6877. The examiner can normally be reached on Monday -Thursday 7:30 am-600 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bucci can be reached on (703) 308-3668. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3597.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2168.
